Hey Steve,

I hope all is well. I just got back this weekend from an oil spill over in southern Utah and got your voice mail as well. I'll take a look at these and give you a call here shortly.

paul

Subject: draft Rico-Argentine Mine Site Removal Action Work Plan

Paul,

As described in my voicemail earlier today, attached is the draft Rico-Argentine Mine Site Removal Action Work Plan (draft RAWP) along with draft Appendix A – Performance Evaluation and Technology Selection and draft Appendix C – Previous Removal Action Task Status and Site Investigations. Atlantic Richfield is still working on Appendix B – Water Treatment Performance Criteria, but wanted to at least get you the what we had developed to date.

Additionally, Atlantic Richfield is working on the draft Hydraulic Control design for an additional relief well, the Solids Management Plan and several miscellaneous documents and hopes to have those to you in the coming weeks. Atlantic Richfield still anticipates installing the additional relief well in 2021.

If you have questions, please let me know.

Steve
